

ACKNOWLEDGMENTS

We thank all the individuals, agencies, and organizations who contributed to the successful completion of the 1990 program.

Fish marked for the 1990 Smolt Monitoring Program (SMP) were provided by Idaho Department of Fish and Game (IDFG), Washington Department of Fisheries (WDF), Washington Department of Wildlife (WDW), U.S. Fish and Wildlife Service (USFWS), and the Oregon Department of Fish and Wildlife (ODFW). We are indebted to the managers and staffs of Lyons Ferry, Wells, Winthrop, Leavenworth, Entiat, Priest Rapids, Ringold, Rapid River, McCall, Dworshak, Sawtooth, Magic Valley, and Irrigon hatcheries, all of whom assisted in the marking program. We extend thanks to the hatchery release coordinators, managers and staffs of all basin facilities for providing timely information on hatchery release.

We extend a special thanks to those who marked fish (PIT tagged or freeze branded) for the SMP and other programs which provide additional marked groups for travel time determinations. Fish marking was carried out by USFWS, IDFG, WDF, ODFW, and Chelan County Public Utility District (PUD).

We appreciate the efforts of the field crews at each of the monitoring sites. Sampling and reporting was carried out by WDF at McNary Dam, by WDW at Lower Monumental and Lower Granite dams, by National Marine Fisheries Service (NMFS) at John Day, The Dalles, and Bonneville dams, and by Chelan County PUD at Rock Island Dam. Juvenile fish traps located near Lewiston, Idaho were operated and sampled by IDFG. We wish to extend thanks to researchers at USFWS for their work on the physiological monitoring program.

In addition to the foregoing monitoring supported under the SMP, related activities by others, such as the fish transportation program supported by the COE, provided valuable information at various monitoring sites. The COE also provides facilities and accommodations for smolt monitoring activities at their projects.

This report was prepared by the Fish Passage Center staff: Michele DeHart, Malcolm Karr, Tom Berggren, Margaret Filardo, Larry Basham, Dave Marvin, Mike Lim, Lucy Bernard, Ted Vieira, and Coral Hughes.

This project was funded by Bonneville Power Administration (BPA), under the Northwest Power Planning Council Fish and Wildlife Program, Section 303(d)(1), BPA Project 87-127.
